

ABSTRACT OF THE DISCLOSURE

5 A ear adornment for allowing a user to adorn an ear of the
user. The ear adornment includes a frame member being designed
for selectively engaging the ear of the user. A sleeve member is
selectively coupled to the frame member whereby the sleeve
member is designed for being positioned adjacent the ear of the
10 user when the frame member engages the ear of the user. The
sleeve member is designed for providing the user with a unique
appearance when the sleeve member is coupled to the frame
member.
